## About AQS »

**AQS Solutions** provides training in support of organizational improvement and implementation of international management system standards. We successfully participated in the RAB pilot project for ISO 9001 Lead Auditor Training in 1993 and the ISO 14001 Lead Auditor Training in 1996. **No organization has been doing RABQSA/Exemplar Global Certified Lead Auditor Training longer than AQS Solutions.**

Established in 1989, we have grown to offer a full range of innovative training services to industry, government, non-profit, and service in areas of Quality, Environment, Energy, Food Safety, and Occupational Health and Safety. Our full time staff and regional technical experts are fully qualified to provide the support you need.

### Our Qualifications

The AQS skill set includes trainers with technical expertise in:

- Manufacturing
- Risk Management
- Automotive
- Service
- Occupational Health and Safety
- Air Pollution
- Medical Device
- Resource Management
- Pollution Prevention
- Emergency Preparedness
- Food
- Government
- Aerospace
- Health Care
- Military
- HACCP
- Agribusiness
- Energy
- Business Continuity
- Energy Management

“ *Instructors’ real life examples really brought a dry subject to life for me!*  
~Stephanie

*This was honestly one of the best trainings I have ever attended!*  
~Melanie ”

## Are you ready to implement and audit to the changes?

Whether you need to understand the changes, learn how to implement the changes in your existing management system, train your existing auditors or learn how to incorporate Risk Based Thinking into your management system, AQS can help!

### » ISO 9001:2015 The Path Forward

**\$995, as low as \$895 • 2-Days • CTUs 1.6 • 8:00 am – 5:00 pm**

This course is intended for management at all levels and others who need to understand the new requirements, what the requirements mean for their organization, and the steps their organization must take to update their current Management System to meet the requirements of ISO 9001:2015.

May 22-23	Philadelphia
June 12-13	Minneapolis
July 17-18	Hartford, CT
August 21-22	Santa Ana
September 18-19	Minneapolis
October 9-10	Washington, DC
November 13-14	Sacramento

- At the end of this course, each participant will leave with a formal, documented and detailed plan that is specific to the needs of their organization. This plan will provide the details you will need to move your organization forward to accomplish two objectives:
  1. Meet the requirements and provide evidence that requirements have been met.
  2. Achieve the embedded benefits contained in the new revisions of the standards. Benefits will focus on the organization and their customers.

### » Risk Management Essentials and Implementation Strategies

**\$495 • 1 Day • CTUs .8 • 8:00 am – 4:30 pm**

This course provides coverage of the risk and opportunity management requirements within ISO 9001:2015 and ISO 14001:2015, as well as the implications these requirements have for your organization. It will include the steps necessary to demonstrate that the risk and opportunity requirements have been met and also return value to the organization.

May 24	Philadelphia
June 14	Minneapolis
July 19	Hartford, CT
August 23	Santa Ana
September 20	Minneapolis
October 11	Washington, DC
November 15	Sacramento

June 15-16

August 24-25

October 26-27

Minneapolis

Santa Ana

Tampa

This course is intended for auditors (external and internal auditors). It will cover the specific differences between the previous revisions of AS9100/AS9110/AS9120 and AS9100/AS9110/AS9120 requirements from an auditor's perspective. This course will emphasize the concepts that will be difficult to audit, including new requirements that are less prescriptive—for example: requiring fewer procedures, QMS-based risk based thinking in addition to operational risk management, knowledge management, product safety, counterfeit parts prevention, and many others.

- Understand the additional level for process effectiveness analysis and the revised PEAR form and Process Evaluation Matrix, including understanding the differences between the terms "Process Results" versus "Process Realization" and linkage to citing nonconformities in an audit.
- Review of the AS9100/AS9110/AS9120 official auditing forms and their purpose, report, NCR, PEAR and QMS Matrix.

# » Are you ready to implement and audit the changes in ISO 9001:2015 / IATF 16949?

Whether you need to understand the changes, learn how to implement the changes in your existing management system or train your existing auditors, AQS can help!

## » ISO 9001:2015 / IATF 16949 The Path Forward

**\$1095**

**2-Days • CTUs 1.6 • 8:00 am – 5:00 pm**

This course is intended for Management at all levels, Quality personnel, and others who need to understand the requirements for the new Automotive Requirements (ISO 9001:2015 and IATF 16949); what the requirements mean for their organization, and the steps their organization must take to update their current QMS to meet these requirements.

- At the end of this course, each participant will leave with a formal, documented and detailed plan that is specific to the needs of their organization. This plan will provide the details you will need to move your organization forward to accomplish two objectives:
  1. Meet the requirements of both standards required by the Automotive Industry (ISO 9001:2015 and IATF 16949) and provide evidence that requirements have been met.
  2. Achieve the embedded benefits contained in the new requirements. Benefits will focus on the organization and their customers.

May 22-23	Philadelphia
June 5-6	Minneapolis
July 24-25	Chicago
September 25-26	Pittsburgh
November 13-14	Atlanta

## » Risk Management Essentials and Implementation Strategies

**\$495**

**1 Day • CTUs 0.8 • 8:00 am – 5:00 pm**

This course provides coverage of the risk and opportunity management requirements within ISO 9001:2015 and ISO 14001:2015, as well as the implications these requirements have for your organization. It will include the steps necessary to demonstrate that the risk and opportunity requirements have been met and also return value to the organization.

November 15	Atlanta

## » ISO 9001:2015 / IATF 16949 Auditor Transition Training

**\$1095**

**2-Days • CTUs 1.6 • 8:00 am – 5:00 pm**

This course is intended for auditors (external and internal auditors). It will cover the specific differences between the ISO/TS 16949:2008 requirements and the new ISO 9001:2015 / IATF 16949 requirements from an auditor's perspective. This course will emphasize the concepts that will be difficult to audit including new requirements that are less prescriptive, including for example; use of procedures and records, risk based thinking, knowledge management, and many others.

Because both **ISO 9001:2015 / IATF 16949 The Path Forward** and **ISO 9001:2015 / IATF 16949 Auditor Transition Training** deal with changes contained in the new revisions of these standards, there is inevitable overlap in course content. While many may choose to take both sessions, some choose one or the other making this overlapping content necessary.

May 25-26	Philadelphia
June 8-9	Minneapolis
July 27-28	Chicago
September 28-29	Pittsburgh
November 16-17	Atlanta

# Online Training

## AQS and QualityWBT Center for Education

have teamed up to meet many of your learning needs. Certificates for continuing education units (CTUs) are issued for completed courses. Every course has practical information and value-added job aids. Classes are specifically geared toward business needs and self-improvement.

All web-based training is 100% asynchronous, at your own place and pace.

Web-based training may meet your needs.

1. Are your training needs knowledge based (information about a topic) as opposed to experiential based (learning manual techniques such as CPR training)?
2. Do you need to stretch your training dollars?
3. Are you looking for ways to improve the effectiveness of your training?
4. Are travel costs an important factor?
5. Is it difficult to schedule training times because of employee schedules?
6. Is it important that everyone trained get the same message/ information?
7. Do students have access to the internet at work or at home?
8. Is it important to keep a record of the training?
9. Do you need immediate access to current training records?
10. Are student capabilities to learn spread over a wide range?
11. Do you prefer training with lots of job aids?
12. Do you want training that is fully Certified and results in recognized CTUs?
13. Do you have students at multiple sites?
14. Do you need a proven training class that has a record of success?

If you find yourself saying yes to the above questions, web-based training may be an attractive training alternative for you to consider.

# The most trusted certification body

People, products, and companies require expertise and independence.

## What are you looking for ?

Founded over 90 years ago, **DEKRA Certification, Inc.** (DCI) has played a significant role in contributing to **product safety and quality management** aspects ever since. DCI and AQS Solutions are both part of DEKRA SE, which is one of the world's leading expert organizations. DEKRA SE has over 35,000 professionals, **active in 70 countries** throughout the world, looking after more than 70,000 customers.

**The DEKRA difference:** Expertise, experience in your field, a constant drive for service value, and the working methods and tools to make it happen. The DEKRA difference is in our approach to the assessment and certification process. **DEKRA knows your business is more than just a spreadsheet filled with yes or no answers.**

DEKRA utilizes a global network of experts who know how to ask the right questions and how to apply the answers and create useful business value from an audit.

**See why over 99% of our customers recommend us!**

## DEKRA Certification Services

Our experience stretches over a multitude of services and industries, including the following:

- ISO 9001
- ISO 14001
- OHSAS 18001/ISO 45001
- ISO 50001
- Superior Energy Performance
- TL9000
- IATF 16949
- AS9100/AS9120
- ISO 13485
- ISO 27001
- ISO 22301
- Greenhouse Gas
- Sustainability
- Corporate Social Responsibility

# Certification with DEKRA

Current AQS clients are eligible to receive a discount on certification services from DEKRA

## The Steps to Certification

### > Preliminary Assessment (optional)

An optional service that allows you to identify any deficiencies or gaps that exist in your management system. It is not part of the certification process, but a tool you may choose to use to help understand what the certification audit will entail.

### > Stage 1 Audit

We seek to develop an understanding of your company that will add value to the entire certification process. During the Stage I Audit, DEKRA will review key aspects of your management system to the standard. DEKRA will then work with you to develop a process-based Audit Program to map out the process audits over the entire certification period.

### > Stage 2 Audit

Using the Audit Program that was developed during the Stage I Audit, DEKRA will select a representative sample of management system processes to audit. This Stage will also establish a final determination of conformance to a standard. There will be a closing meeting to discuss findings and the results of the audit.

### > Certification

After completion of the Stage II Audit, the closure of any major non-conformities, and acceptance by DEKRA of your corrective action plan, the auditor recommends certification. DEKRA will then perform a final review of all reports and relevant client data. Once approved, your certification will be issued, and DEKRA will publish your achievement to the appropriate databases.

### > Surveillance Audits

Once certified, DEKRA will perform on-site Surveillance Audits at a minimum yearly interval to maintain your certification.

## Transferring an Existing Certification

Unhappy with your current Certification Body? DEKRA can transfer your certification in a short period of time. For most standards, including ISO 9001 and AS9100, there is no cost to transfer to DEKRA!

A company may transfer Certification Bodies anytime in the audit cycle. It is not necessary to wait until the current certificate is near renewal. The process is very simple:

### > Off-Site Transfer Review

DEKRA will request the client to submit a copy of the current certificate, previous cycle audit reports from the previous registrar, and a copy of any non-conformance closures, if applicable, for review.

### > Transfer Audit

An audit will then be performed for the upcoming event (renewal or surveillance) in line with your current schedule.

### > Issuance of New DEKRA Certificate

DEKRA will issue a new certificate with your current expiration date within one to two weeks of the transfer audit.

# DEKRA's Unique Approach

**DEKRA is on the leading edge among certification bodies.** We have one of the highest satisfaction rates in the industry (over 99%); we are one of the only certification bodies to offer no-cost certification transfers; and we are constantly using the newest innovations in the industry to help your business. Below, we feature two of the techniques we use to help get your certification more quickly and easily.

## Advanced Surveillance and Recertification Procedures (ASRP)

Advanced Surveillance and Recertification Procedures is a process applied to certified organizations that have a proven performance track record of maintaining the integrity of their management system. The benefits of applying ASRP favor the organization by providing more effective and efficient audits to the organization and reduce certification fees to the organization. The ASRP program places more dependence on the organization's internal audit and management review processes. This is done by allowing qualifying companies to rely more heavily on internal audits, special targeted surveillance audits, and the use of input from the organization.

Not only does ASRP provide benefits for companies, but for consumers as well. The efficiency of the process can lead to quicker effectiveness and more efficient resource allocation over time. In terms of cost reduction for businesses, companies using ASRP will see reduced third-party audits. When reducing the amount of time, visits, and money spent on audits during recertification, companies can allocate resources elsewhere to improve efficiency and effectiveness of their systems.

Management systems will see continuous improvement despite the reduced rate of external audits. While relying on internal audits, organizations using ASRP will spend more time doing normal day to day activities rather than experiencing disruptions in their business or management systems.

## Computer-Assisted Auditing Techniques (CAAT)

The traditional certification process has become lengthy, involving many visits from auditors and extensive meetings about perfecting systems to meet industry standards. This process can give both parties a headache from the beginning due to on-site time requirements that don't always fit the way a company or their system is set up. This is what led to the development of CAAT.

When a business chooses to get certified using Computer Assisted Auditing Techniques, the Certification Body spends less time on-site and more time relying on remote access through computers. This allows them to catch inefficiencies in processes and management systems earlier on and make adjustments quickly. With older techniques, corrections that were desperately needed were not discovered until the next time an auditor came by to visit.

Resource conservation is the main concern for most businesses being audited, but CAAT will also benefit businesses by creating more flexibility in audits and certifications through web and telephone conferencing. By allowing remote access to management systems, businesses can be audited and spend less time in meetings with auditors. CAAT is one of the easiest and most effective ways to be audited without the hassle in today's fast-paced business world.
